

TRUST2GO

Sign your contracts fully digital

What is TRUST2GO®?

As a **qualified signature**, TRUST2GO® is the digital alternative to "wet signatures". Thanks to eIDAS-regulation, it has the legal effect of a handwritten signature. The signature can be applied to documents using our **free Trust2GoClient software**. The signature is triggered either via SMS-TAN or via a smartphone app using PIN entry, fingerprint or face-ID.

Why TRUST2GO®

- **FLEXIBLE** – You trigger the signature process via SMS-TAN procedure, or smartphone app (PIN, fingerprint or face-ID). Android and Apple devices are supported
- **BINDING** – The signature has the same legal effects as a handwritten signature. We guarantee that all requirements of Austrian and European signature law are fulfilled
- **CONFIDENT** – Your critical documents do **not** leave the workplace. Only a non-falsifiable encrypted hash value is signed
- **RELIABLE** – We issue signature certificates for business use. This is visible in the signature. Signatory, company and function are identified
- **SCALEABLE** – solutions for every company size and budget
- **PERFORMANT** – multiple signature, batch signature, and mass sealing are supported

ALL YOUR BENEFITS

Real Story

Private mobile signature abused

A company has been using electronic signatures for years. After an employee was dismissed in a dispute, he continued to sign. But not to the company's advantage. Because free private signatures were used, there was no possibility for the management to revoke them. This resulted in financial damage that could have been avoided by using a signature product suitable for business transactions.

EASY HANDLING AND SYSTEM INTEGRATION

- ✓ Simple pdf signature with free Trust2GoClient software
- ✓ Signature triggering via smartphone app (PIN, fingerprint, face recognition) alternatively SMS-TAN
- ✓ Particularly easy integration into existing backend systems (SAP, Microsoft, Oracle, ...)

PRICING

- ✓ Subscription solution with annual billing
- ✓ Costs per signature are in the low cent range
- ✓ Signature contingent can be flexibly adapted
- ✓ Sensational reseller and distributor prices
