

GLOBALTRUST SIGNATURE

electronic ID for enterprises and individuals

What is GLOBALTRUST SIGNATURE?

GLOBALTRUST® SIGNATURE provides certificates for electronic signing and sealing. These can be used to ensure the origin of a document, as well as the content has not been secretly altered. Signatures can be used to sign and encrypt any type of electronic data. Main use cases include electronic invoices, PDF contracts and Email encryption. Reputable companies only use signed invoices. They are provided with the sender's certified digital identity. Recipients can therefore be certain that they are actually receiving an original invoice and that it really comes from the sender. GLOBALTRUST® guarantees the correctness of the signature data.

Why GLOBALTRUST® SIGNATURE:

- **PRECISE** - every application goes through a comprehensive identity check to avoid identity theft
- **COMPLIANT** - the GLOBALTRUST® team constantly monitors developments in certification technology and advises on the transition to new standards
- **SCALEABLE** - solutions for every company size and budget
- **FLEXIBLE** - our team deals with any special requests in the range of what is technically possible and legally permitted
- **SECURE** - GLOBALTRUST® SIGNATURE certificates are issued according to the state of the art and are considered more forgery-proof than classic ID documents
- **FREE** - additional contingent of qualified timestamps free of charge
